## Expansion of the Alpha Stem Cell and Gene Therapy Clinic at UCLA

### Grant Award Details

---

Expansion of the Alpha Stem Cell and Gene Therapy Clinic at UCLA

**Grant Type:** Alpha Stem Cell Clinics Network Expansion

**Grant Number:** INFR4-13685

**Investigator:**

<b>Name:</b>	Noah Federman
<b>Institution:</b>	University of California, Los Angeles
<b>Type:</b>	PI

---

**Award Value:** \$8,000,000

**Status:** Pre-Active

### Grant Application Details

---

**Application Title:** Expansion of the Alpha Stem Cell and Gene Therapy Clinic at UCLA

**Public Abstract:** The ASCC provides infrastructure and operational support across the Network to drive novel stem cell therapies from bench to bedside. The ASCC will engage underserved communities in California to increase education and access to regenerative medicine trials and therapeutics.

**Statement of Benefit to California:** The ASCC will accelerate the clinical trial pipeline of novel regenerative medicine therapeutics and solidify California as a pioneer state in gene and cellular therapy development. Cross-pollination with the other sites in the ASCC Network will improve efficiencies, remove redundancies and facilitate broad engagement with under-resourced and underserved Californians, including the Black and Latino communities profoundly affected by Sickle Cell Disease.
